Pittsburgh, PA | jordanlbenn@gmail.com | www.linkedin.com/in/jordan-l-bennett

## EDUCATION

**University of Pittsburgh – Bradford**

**Bradford, PA**

*BS in Computer Information Systems*

*May 2026*

- **Minors:** Cybersecurity & Digital Forensics, Criminal Justice
- **Awards:** Cum Laude (GPA: 3.5), Dean's Honor List (Summer 2024 – Spring 2026)
- **Relevant Coursework:** Network Security & Cryptography, Intrusion Detection & Incident Response

## WORK EXPERIENCE

**Women Against Abusive Relationships (WAAR)**

**Pittsburgh, PA**

*Cybersecurity Research Intern*

*January 2026 – April 2026*

- Assisted with cybersecurity awareness initiatives by supporting presentations on phishing, password security, and safe technology practices.
- Conducted website auditing and security reviews to identify potential vulnerabilities, outdated information, and areas for improvement.
- Supported secure technology usage by identifying operational and cybersecurity-related risks within organizational processes.
- Researched cybersecurity threats, attack trends, and security best practices to support organizational security awareness efforts.

**University of Pittsburgh – Bradford**

**Bradford, PA**

*Office of Residence Life & Housing*

*Resident Advisor*

*August 2024 – May 2026*

- Monitored and responded to resident incidents while following university policies, escalation procedures, and safety protocols for a residential community of 25+ students.
- Documented incidents, behavioral concerns, and policy violations accurately through university reporting systems while maintaining confidentiality and attention to detail.
- Managed multiple responsibilities in fast-paced environments while demonstrating professionalism, problem-solving, and strong interpersonal communication skills.

## PROJECTS

**Security Log Analysis Lab (Academic)**

- Analyzed simulated security logs using Splunk to identify suspicious authentication attempts and unusual activity patterns.
- Investigated failed login attempts, account lockouts, and unauthorized access indicators across multiple log sources.
- Documented findings, escalated suspicious activity scenarios, and recommended basic incident response actions.
